

Ask Dr. Juli

Episode 01.02 - Check Mate!

by Ron L. Palmer

FADE IN:

INT. WHITE SCREEN

One shot Julianna as she introduces this week's topic.

JULIANNA

Hello, I'm Dr. Julianna Grimaldi,  
world renown relationship expert.

Graphic: MALEbox

JULIANNA (CONT'D)

Howard Lawson of Urbana, Illinois  
asks "Dr. Juli... how come I always  
see men checking out women, but I  
never see women checking out men?"

One shot, Julianna

JULIANNA (CONT'D)

That's an excellent question,  
Howard...

EXT. OUTDOOR CAFE - DAY

HOT GIRL catches MR. SMOOTH'S attention. He's so mesmerized  
that he spills his drink all over himself. Hot Girl laughs.

JULIANNA

...and for years scientists operated  
under one simple theory: men just  
aren't very smooth. In fact, as  
recent study from the National  
Institute for Male-Female  
Observation...

One shot, Julianna.

Graphic NIMFO over screen.

JULIANNA (CONT'D)

Or "NIMFO"... indicates that men are  
126-times more likely to get caught  
checking out a woman than a woman is  
a man, even though, on average, both  
genders check each other out equally.  
The reason why is actually a matter  
of quantum physics.

Film Projector is turned on.

EXT. LUSTENSEX UNIVERSITY, 1960'S - DAY

Two test subjects are walking down the street. COREY checks out SAFRON and does not do so covertly. He stops, stares and does not attempt to conceal his glances. Graphic shows "Lustensex University case study"

JULIANNA

You see, when a man comes across a woman he wishes to check out, space-time around him moves at a slower rate, while moving at regular speed within his perceptible "bubble." Notice how his stare seems to last longer than it should, well after the female subject has passed.

Thought bubble graphic appears next to man which reads:  
"Ass: Great! Boobs: Real!"

JULIANNA (CONT'D)

Unfortunately for the male, this process provides an insufficient amount of data, and he will often have to repeat it a second time to determine whether this particular female is a potential partner.

Safron walks past Corey and checks him out. Her glance is barely perceptible.

JULIANNA (CONT'D)

Conversely, when a woman checks out a man, space-time speeds up as she is able to gather all the necessary data in what appears to be a fraction of a fraction-of-a-second.

JULIANNA (CONT'D)

Did you see it? If we slow it down,

Close of up Safron, examining her eyes. The film is repeatedly replayed, "JFK" style.

JULIANNA (CONT'D)

You can see the woman's eyes move ever so briefly. Back and to the left. Back and to the left. Back and to the left.

Graphic shows woman processing such items as ambition, intelligence, confidence, procreation potential, douchebaggery, compatability, income, credit score, political

affiliation (independent), sense of humor, passion potential and favorite TV show.

JULIANNA (CONT'D)

In that time, the female gathers a massive amount of data which she efficiently processes to determine if this particular male is a suitable partner.

INT. WHITE SCREEN

One shot, Julianna

JULIANNA (CONT'D)

I hope that answers your question, Howard. Join me next time when we'll explore how women are able to internalize their farts and why men think theirs are impressive. Til then, I'm Dr. Julianna Grimaldi reminding the ladies out there to keep it hot and keep it crazy!
